

Jurassic Park

(Universal, 1993)

No v* but a few possibly triggering moments.

Shortly after Nerdy speaks to the Dilophosaurus like its a dog (throws a stick to play fetch) the Dilophosaurus spits green venom onto him, which could be a triggering visual.

There is some triggering speech about an hour and 16 minutes in. In the car in the tree, Tim says, "I t*u*" to Grant and Grant says he won't tell anyone.

Later, Tim coughs and gasps when he comes to after being electrocuted, its just him catching his breath but the audio could be triggering.
