

IF OFFSCREEN IS CHECKED OFF

If you see a red check next to “offscreen” in a warning, that means that whatever the trigger is, it is not visible. For example, someone could run offscreen before being sick, or could lean over the side of something so that it is not seen by us. This however, does not mean that there isn’t audio or a moment before. See the description of the scene in the warning to know what to expect.
