

Lilo & Stitch

(Disney, 2002)

Towards the beginning after Stitch first talks, a robot is seen v*ing some metal. It's off to the side of the screen and brief.

About 32 minutes in when Lilo and Stitch are at the luau and get cake, Stitch eats it and then spits it out. The noises could be triggering. Same thing for a couple moments later when he bites Pleakley's head.
