

# Knives Out

(Lionsgate, 2019)

This was submitted.

“The main character of the story t\*s u\* every time she lies and I don’t wanna spoil the movie but throughout the entire film she is v\*ing every 15-20 minutes or so. Other than the final scene, it is always in a cup or toilet but in the final scene it happens in someone’s face. The specific type of trigger is different for each scene but the film in it’s entirety contains all five triggers listed on the website.”
